EXPERIENCE

Full-Stack Development Intern - VeloxCodeAgency | Jun 2026 | [Certificate](#)

- Built MiniTrack AI, a full-stack student wellness platform using React, Express, MongoDB and Flask, with a Random Forest stress-classification module reaching 88.8% accuracy on 20 clinical metrics, plus journaling and analytics dashboards.
- Developed VisionTrack AI, a real-time computer-vision application using React, Node.js, Flask, YOLOv8 and OpenCV for object detection, tracking and H.264/RTSP video playback.

Full Stack Developer Intern - SuccessPath Classes (Remote) | Jan 2026 - Feb 2026 | [Certificate](#)

- Built and structured the SuccessPath Classes website across Landing, About, Services, Programs, and Contact pages with a clear user-focused navigation flow.
- Developed a Student Management System with admin/student login, profiles, marks management, result viewing, and announcements to support academic workflows.

EDUCATION

BMS Institute of Technology and Management - Bengaluru, India | B.E. Computer Science Engineering | 2024 - 2028 | CGPA: 8.72

TECHNICAL SKILLS

Languages: C, C++, Python, JavaScript

AI Systems: LangChain, LangGraph, OpenAI SDK, RAG / CRAG, Embeddings, Vector Search

Backend & Data: FastAPI, Node.js, Express.js, PostgreSQL, MongoDB, pgvector, REST APIs

Infra & Tools: Docker, Git & GitHub, Vercel, Render, Postman

PROJECTS

TARK AI - Agentic AI Workspace / Personal OS | [GitHub](#)

Tech: React, FastAPI, PostgreSQL, pgvector, LangGraph, LLM APIs, MCP, Docker

- Built a full-stack Agentic AI Workspace / Personal OS for conversational AI, web search, Deep Research, coding, multimodal document understanding, persistent memory and project context.
- Engineered an async event-driven core supporting 100+ concurrent user sessions, with LangGraph orchestrating 3-5 parallel sub-agents and a Corrective RAG pipeline using hybrid retrieval, BGE Cross-Encoder reranking and citation grounding.
- Reduced token consumption ~35% through prompt decomposition, caching and multi-provider routing; integrated 11+ native tools and 21 GitHub MCP tools with real-time SSE streaming.

SYNCORA - AI-Powered Team Collaboration & Productivity Platform | [GitHub](#)

Tech: React, TypeScript, Node.js, Express, MySQL, Socket.io, WebRTC, NVIDIA Nemotron, JWT

- Built a full-stack collaboration platform combining real-time channel/direct messaging, Kanban task management, WebRTC meetings and AI-assisted workflows.
- Engineered a high-concurrency Node.js/Express/MySQL/Socket.io architecture with JWT authentication, RBAC and low-latency bi-directional event streaming for messaging and call signaling.
- Integrated NVIDIA Nemotron meeting intelligence to transform transcripts and chat history into structured summaries, decisions, blockers and assignable tasks.

CHURN REAPER - Customer Retention & Churn Intelligence System | [GitHub](#)

Tech: Python, FastAPI, XGBoost, Scikit-Learn, TreeSHAP, NVIDIA Nemotron, React

- Built an end-to-end churn intelligence system using React and FastAPI to ingest customer data, generate real-time churn risk scores, identify high-risk accounts and support targeted retention decisions.
- Engineered an XGBoost classification pipeline with automated preprocessing, low-latency inference and TreeSHAP attribution to surface contract, pricing and behavioral drivers behind individual churn scores.
- Integrated an AI-assisted retention engine with deterministic financial modeling to generate tailored offers and quantify Customer Lifetime Value, profit at risk and projected ROI.

ACHIEVEMENTS & CERTIFICATIONS

- Best Innovation - Agentic AI Sprint Workshop + Hackathon, GenAI Club, BMSIT&M; 3rd Place + Rs.10,000 Prize - National-Level Sustainathon.

Certifications

- The Complete Full-Stack Web Development Bootcamp - Udemy | [Certificate](#)
- AI Engineer Agentic Track: The Complete Agent & MCP Course - Udemy | [Credential](#)
