EDUCATION

BMS Institute of Technology and Management — Bengaluru, India
Bachelor of Engineering in Computer Science Engineering | CGPA: 8.72

Sep 2024 – Sep 2028

TECHNICAL SKILLS

Languages: C, C++, Python, JavaScript

AI Systems: LangChain, LangGraph, OpenAI SDK, RAG / CRAG, Embeddings, Vector Search

Backend & Data: FastAPI, Node.js, Express.js, PostgreSQL, MongoDB, pgvector, REST APIs

Infra & Tools: Docker, Git & GitHub, Vercel, Render, Postman

EXPERIENCE

Full-Stack Development Intern — VeloxCodeAgency

01 Jun 2026 – 30 Jun 2026

- Contributed to full-stack web development workflows during a focused internship, working across implementation, debugging, feature development, and delivery.
- Built practical experience across frontend and backend development while collaborating on application development tasks.

[View Certificate](#)

Full Stack Developer (Intern) — SuccessPath Classes (Remote)

19 Jan 2026 – 18 Feb 2026

- Contributed to full-stack web development work across feature implementation, debugging, and deployment workflows.
- Applied frontend and backend development practices to build and improve application features in a collaborative environment.

[View Certificate](#)

PROJECTS

TARK AI — Agentic AI Workspace & Personal OS

[GitHub](#)

Tech: React, Python, FastAPI, PostgreSQL, pgvector, LangGraph, LLM APIs, MCP, Docker

- Built a full-stack Agentic AI Workspace / Personal OS for conversational AI, web search, Deep Research, coding, multimodal document understanding, persistent memory, project context, and AI-powered productivity workflows.
- Engineered multi-model LLM routing and agentic tool loops with RAG/CRAG, hybrid retrieval, embeddings, pgvector, reranking, query rewriting, grounded generation, hallucination controls, persistent memory, and real-time SSE streaming.
- Integrated real-world AI actions across Google Calendar, Tasks, Reminders, Goals, and 21 GitHub MCP tools, enabling research, scheduling, planning, and repository operations with OAuth, user isolation, and confirmation-gated writes.

Syncora — AI-Powered Team Collaboration & Productivity Platform

[GitHub](#)

Tech: React, TypeScript, Node.js, Express, MySQL, Socket.io, WebRTC, NVIDIA Nemotron, REST APIs, JWT

- Built a full-stack team collaboration platform combining real-time channel and direct messaging, WebRTC audio/video meetings, Kanban task management, and AI-assisted workflows into a unified workspace.
- Engineered a high-concurrency architecture with Node.js, Express, MySQL, and Socket.io, implementing JWT-based authentication, RBAC, relational data flows, and low-latency bi-directional event streaming for messaging and call signaling.
- Implemented an automated meeting intelligence pipeline using NVIDIA Nemotron, processing transcripts and chat history to generate structured summaries, decisions and blockers, and convert action items into assignable tasks.

Churn Reaper — Customer Retention & Churn Intelligence System

[GitHub](#)

Tech: Python, FastAPI, XGBoost, Scikit-Learn, TreeSHAP, NVIDIA Nemotron LLM, React, Tailwind CSS

- Architected an end-to-end churn intelligence system using React and FastAPI to ingest customer data, predict real-time churn risk, identify high-risk accounts, and support retention decisions.
- Engineered an XGBoost classification pipeline with automated preprocessing, low-latency inference, and TreeSHAP attribution to identify contract, pricing, and behavioral factors driving individual churn scores.
- Integrated an AI-assisted retention engine with deterministic financial modeling to generate tailored offers and calculate customer lifetime value, expected profit at risk, and projected ROI for intervention decisions.

ACHIEVEMENTS

- Secured 3rd Place and won a ₹10,000 cash prize at a National-Level Sustainathon for developing a piezoelectric energy-harvesting system.
- Recognized for building “Churn Reaper,” an AI-powered customer churn prediction system focused on innovative business analytics solutions.

CERTIFICATIONS

- The Complete Full-Stack Web Development Bootcamp — Udemy [Certificate](#)
- AI Engineer Agentic Track: The Complete Agent & MCP Course — Udemy [Credential](#)
