EDUCATION

BMS Institute of Technology and Management

Bachelor of Engineering in Computer Science engineering; CGPA: 8.72

Bengaluru, India

Sep 2024 – Sep 2028

Ms Memorial Public School

Higher Secondary Education (CBSE); Percentage: 91%

India

Apr 2022 – Apr 2024

TECHNICAL SKILLS

TECHNICAL SKILLS

Web Development: MERN Stack (MongoDB, Express.js, React.js, Node.js, PostgreSQL)

Programming Languages: TypeScript, JavaScript, Python, C++

AI & Agentic Frameworks: LangChain, LangGraph, CrewAI, Machine Learning, Agentic AI, OpenAI SDK, RAG, CRAG

Tools & Technologies: Git, GitHub, Vercel, REST APIs, Tailwind CSS, n8n

Core Skills: Responsive UI Development, API Integration, Debugging, Version Control, Automation

EXPERIENCE

Full Stack Developer Intern

Jan 2026 – Feb 2026

SuccessPath Classes (Remote)

- Worked on full-stack web development projects using modern web technologies.
- Contributed to feature development, debugging, and deployment tasks.
- Demonstrated strong problem-solving and collaborative development skills.

Web Master (Current)

Nov 2025 – Present

IEEE EMBS, BMSIT&M

- Developed and maintain the official IEEE EMBS, BMSIT&M website.
- Built an AI-powered MRI verification system using AI/ML and image processing techniques.
- Contributed to production-level feature development and deployment.

Leadership & Collaboration:

- Coordinated with teams during continuous event operations and technical activities.

PROJECTS

Churn Reaper – AI-Powered Customer Churn Prediction System | Python, XGBoost, Machine Learning, Streamlit, Scikit-learn

- Developed an end-to-end machine learning application to predict customer churn using behavioral and transactional customer data.
- Implemented the XGBoost algorithm for high-accuracy churn prediction and optimized model performance through preprocessing and feature engineering.
- Built an interactive Streamlit dashboard for real-time churn prediction and business insight visualization.
- Applied predictive analytics to identify high-risk customers and support customer retention strategies.

GitHub: github.com/gpranit16/churn-reaper

MailMind – AI Email Automation Platform | React, FastAPI, XGBoost, SVM, ChromaDB

- Built an AI email assistant for spam filtering, intent detection, sentiment analysis, and automated replies.
- Integrated Gmail + Google Calendar APIs for intelligent meeting scheduling and conflict-aware automation.
- Developed a React/FastAPI dashboard with ChromaDB memory for analytics and conversation tracking.

ACHIEVEMENTS

- Awarded “Best Innovation” at the Agentic AI Sprint Workshop + Hackathon on AI Agents organized by GenAI Club, BMSIT&M.
- Secured 3rd Place and won a ₹10,000 cash prize at a National-Level Sustainathon for developing a piezoelectric energy-harvesting system.
- Recognized for building “Churn Reaper,” an AI-powered customer churn prediction system focused on innovative business analytics solutions.
